

MKS Sustainability Consulting Services

Environmental Policy Development

Looking to reduce plastic pollution? Update your sustainable purchasing policy? Set a new climate commitment?

More about the service I support client policy objectives by reviewing similar policies from peer cities, recommending best practices, and producing first-draft policies for legal counsel refinement. Here are some project types on offer:

- Support defining a policy roadmap (i.e. a portfolio of strategies to develop over time in support of one or more environmental goals)
- Review of peer and leading city policies with report on common practices, best-of policy language, etc.
- Side-by-side comparisons of pros, cons, and other considerations across multiple policy types to support decision making
- Policy recommendations and draft policy language (note: policies must be revised by organization's legal team, recommendations are non-legal drafts)

Project examples City of Fort Collins Disposable Bag Ordinance; City of Fort Collins Climate Action City Council Policy Roadmap
