

# MKS Sustainability Consulting Services

## Sustainability Strategy and Planning

Just getting started with climate action and need help plotting a course? Are your existing plans outdated and need a refresh? Do you want to focus more on the integration of climate resilience and equity in how your community gets to carbon neutral? Do you want your plans to better integrate your community's leadership and action potential?

**More about the service** I team up with other sustainability experts to help organizations (and communities) set goals, develop or update strategies, and get started on next steps. Each project is different but MKS Sustainability Consulting and its partner consulting firms emphasize:

- Community voice, leadership, and action potential as an essential element of the plan
- Trust-building, reciprocity, and near-term action as part of engaging the community
- Equity and people-centered planning practices and outcomes
- High-impact practices, multi-impact practices, and enabling actions
- Logic models and theory of change to bring focus to a cluttered menu of possible actions

**Project examples** City of Fort Collins Our Climate Future Plan
